

Think inside the box

PURELAB® Option-Q 7/15*

DI Pack ELC163

Lifetime expectancy:** 6 months
What is purified from the water? Ions
Impact of not changing: Weakly bound ions are released back into the water reducing resistivity

Composite Vent Filter ELC136

Lifetime expectancy:** 6 months
What protection does it provide? Reduces CO₂ and airborne organics from entering the sealed system
Impact of not changing: Increase in airborne contaminants and potential recontamination of purified water

Pre-Treatment ELC140

Lifetime expectancy:** 6 months
What is purified from the water? Chlorine and particulates
Impact of not changing: Chlorine, chloramine and organics remain increasing the burden on downstream consumables which will need more frequent and expensive changes

Reverse Osmosis ELC143

Lifetime expectancy:** 24-36 months
What is purified from the water? Majority of organics and inorganics
Impact of not changing: High levels of organics and inorganics remain in the water reducing the functional life of the DI Pack
Note: Replacement need technician support

UV Lamp 185 nm ELC118

Lifetime expectancy:** 12 months
What is purified from the water? Majority of organics and inorganics
Impact of not changing: Uncontrolled bacterial contamination and TOC levels are not reduced

Point Of Use Filter*** ELC145

Lifetime expectancy:** 3 months
What is purified from the water? Particulates and bacteria
Impact of not changing: Potential recontamination of purified water and reduced flow rates

* A combination of treatments and technologies produce the final water specification

** Service life will depend on the application and feed water quality

*** For DNA, RNA & endotoxin specification at point of use, please use a ELC197 Biofilter
